RETUMBLER-myVIVERO

Thermo mug

| | |
|-------------------|------------------------------------|
| Material | stainless steel, plastic, silicone |
| Measurements | 148 x 88 x 68 mm |
| Weight | 242 g |
| Packaging | polybag |
| Branding area | 33 x 80 mm |
| Handling category | B |

The transparent outer layer communicates lightness; the “floating” inner cup robustness.

The large printable lid made from PP plastic is smoothly adjustable and can be opened wide.

Our favourite mug myVivero is a real talent. The entire cup fits under even the small coffee machines.

MyVivero has been developed with a tapered design. Its clever shape allows a secure grip at all times.

myCasan & myPetrolina: Drinking bottles with individual carrying strap.

The **CASAN** drinking bottle is one of our most popular bottles. Reason enough to let the family grow! Above, new individualisation possibilities are making parts of this article group more popular than ever. The drinking bottles from the **CASAN family** are now also available with individualised straps! As with lanyards, you can freely design them and make them, even when viewed from a distance, an eye-catcher. Choose a **CASAN** drinking bottle or the **PETROLINA** drinking bottle. Both are available in different colours and filling quantities (from 350ml).

From 3,000 pieces, the bottle colour and the colour of the soft grip on the cap can be adjusted. The buckle made of high-quality aluminium is available in matt silver and black lacquer. An elegant laser engraving on the buckle completes your myCasan in detail. The polyester strap is customised with your design using heat transfer. Alternative straps and customisation are available on request.

Choose a drinking bottle

Choose a CASAN drinking bottle or the PETROLINA drinking bottle. Both are available in different colours and filling quantities (from 350ml). From 3,000 pieces, the bottle colour and the colour of the soft grip on the cap can be adjusted.

Choose buckle and customisation:

The buckle made of high-quality aluminium is available in matt silver and black lacquer. An elegant laser engraving on the buckle completes your myCasan in detail.

Choose the strap material and customisation

The polyester strap is available from 100 pieces and customised with your design using heat transfer. Alternative straps and customisation are available from 3,000 pieces on request.

Choose drinking bottle with customisation:

Place your advertising message expressively on the bottle body. As usual, it can be easily printed with your motif/logo.

Advertising with impact:

Step by step to your individual drinking bottle.

It is a big move towards more individuality and a corporate look: Do not customise as usual and ensure maximum recognition of your brand with a carrier strap in your colours and with your distinctive motif. The 15 cm long strap, made of polyester, can be completely individualised with heat transfer. Here, we cooperate with an

extremely reliable and competent partner in the EU. The bottles are printed at the company's site in Cologne and finished with your customised straps. Of course, we will also make sure that your masterpiece reaches you as quickly as possible in order to make sure your advertising can make an impact.

The Casan family:
the sports drink bottle,
that adapts to you.

REEVES-HAMPTON

3-in-1 Charging Cable with Light

A cable that meets your daily charging needs. The Luminous Collection's multi charging cable has 3 different charging connectors: Micro USB, USB-C plug and 5-pin for Apple. The durable nylon sheath protects the 3-in-1 multi USB cable from everyday wear and tear and makes it resistant. But the absolute highlight is the distributor, which is the finishing surface and backlit. So everything you have engraved lights up when you put it into operation. And that's definitely a spectacular way of showing off a logo.

COOL WATCH CONCEPTS

OUR COLLECTION

The RETIME collection offers 37 base watch models in a wide variety of designs. There is something for every target group, whether it be sporty, timeless classics, chronographs or children's watches. All our watches offer high degree of customisation possibilities; components, materials and colors can be adapted to your corporate design guidelines.

RE-LAUNCH LOLLICLOCK ROCK

Our beautiful desk clock, the Lolliclock Rock, formal winner of the Promotional Gift Award in 2013, deserved a design and technical update. The shape of the clock has been unchanged, but the bezel now has a straightforward and contemporary design, and the dial has a new look with sleek hands.

In times where sustainability is a top priority, we have turned our table clock into a fully sustainable time-piece - a solar clock made of a high-quality alloy, innovative hidden solar cells, allows a lifetime without changing batteries and the use of plastic as a case material has been discarded.

As another member from the re-launch of the "Rock" family, we introduce the first thermometer within the RETIME brand. In the same design language, makes them a collection. As an addition to the thermometer and solar clock, we will also introduce a budget friendly 3-hands clock to the collection.

Both watches can be fully customized from 25 pieces upwards! For more information, we look forward to your call.

| Glass | hardened mineralglass |
| Movement | Thermometer |
| Price category | €€€€€€ |

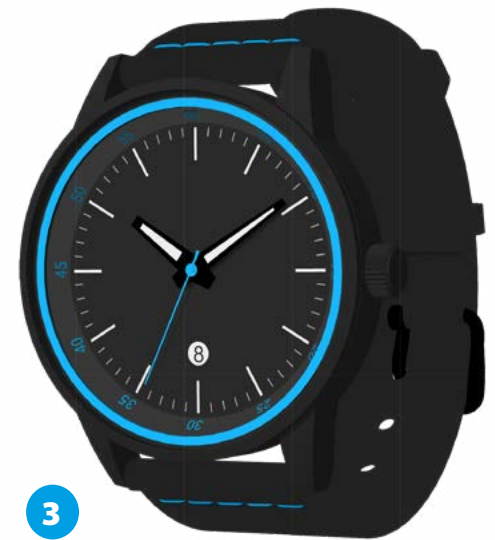

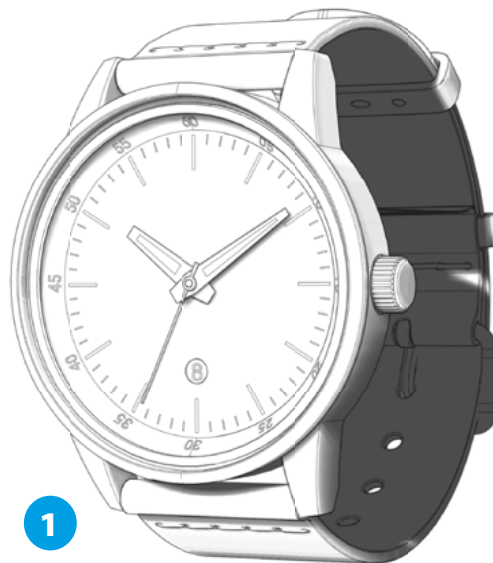

OUR NEW DESIGN PROCESS

We all know that watches are emotional products. We would like to put the 'wow' factor into the design process, so our customers can 'feel' their watches even before the first watch produced. To achieve this, we moved our design process to detailed 3D modeling, providing our customers high quality, lifelike renderings and stunning 360 degrees animations. 3D renderings available for all our standard models from 25 pcs and individualized watches from 100 pcs.

1. General idea
2. 3D wireframe modeling
3. High quality rendering
4. Final product
