## *recent additions*

We are pleased to announce the addition of Re Tee & Missteegreen to our own Lorente range. Thus we become their exclusive distributors in Europe to market their registered goods. Due to the great success they have had in their respective markets, we are confident that your Pro Shop will welcome ReTee & Missteegreen products.

### **ReTee. A Canada based Company.**

The ReTee concept came from the golf course on an Autumn day in Canada. With the ground hard, every swing from the tee box broke a tee. Finally with 4 holes to go and only 3 tees left in my bag we got to the par 3 (6th hole) but no broken tees were on the tee box! That's when my golf partner Sid handed me my broken 3 1/4 inch tee from the par 5 (5th hole) sharpened by his pencil sharpener into a perfect Par 3 tee! I thought it was the smartest thing I had seen reusing broken longer tees to use on par 3 or short par 4s. Only problem was how would we get people to use a pencil sharpener on the golf course? So ReTee combined it with a divot tool and set off to design a tool that would help people repair divots properly and save the environment from wasted pencils and tees.

See Page 22.

### **Missteegreen. A France based Atelier.**

Missteegreen workshop was born during a round of golf. Sompras, the creator of the brand, did not have a pocket to store her ball marker. So she naturally found a practical solution to always have her ball marker at hand. Thanks to her experience in the artistic field, she could imagine, draw and build a first prototype. French Quality and Craftsmanship, elegance and style are for her integral part of her products. Missteegreen thus gives great importance to the materials used as well as the attention paid to the design and production of jewelry for female golfers. All her jewels are also designed and produced in France because quality also requires skills and know-how. Her jewels allow you to keep your ball marker and count your shots.
